CLEAN THE GREEN

ZolaTerra® Greenhouse cleaning products are plant-based cleaners designed to help you clean all greenhouse surfaces while increasing efficiency. The safe and easy cleaner is formulated to remove the dirt, grime, mold and algae that occur inside a greenhouse. These products can even work when you're not working!

Surfaces For Use On:

- Polystyrene
- Stainless Steel
- Granite
- Wood
- Tile
- Brick, Stone, Asphalt
- Acrylic
- Composite Decking
- Glass
- Fiberglass
- Plexiglass
- Concrete
- Aluminum

Product Benefits:

- **Will NOT Harm Plants**
- Plant-Based Formula
- No Toxic Chemicals or Bleach
- Won't Etch Surface
- No Phosphates or Chlorine
- Non-Corrosive, Non-Flammable
- Biodegradable
- Safe For Plants & Livestock
- No Harsh Odor
- Clean in a Closed Environment
- Increased Growing Cycles
- No Special Handling or Storage

No ingredients are on the Proposition 65 list!

Ask how we can save you money in shipping by using our JAW products!

ZolaTerra® CLEAN THE GREEN is a more concentrated to cleaner, safe to use around plants. Cleans and removes mold, algae, dirt and grime from concrete, acrylic, aluminum, glass and stainless-steel. Cleans without any special gloves or handling

Product Details:

Available in 32 oz, 1 & 5 Gallon sizes
(Larger quantities available)
Just Add Water (JAW) Products
Ready-To-Use (RTU) Products
Manufactured and assembled in USA
Family owned & operated

How to Use: (For best results)

Remove any loose debris and dirt.

JAW Product: Tilt & slowly fill bottle with reverse osmosis water. Tightly twist sprayer/cap onto bottle, shake to mix. Then follow RTU instructions.

RTU Product: Spray onto surface, wait up to 30 minutes, or let dwell overnight, rinse w/hot or warm water using jet setting on hose or pressure washer. To slow regrowth or mold/algae, reapply/spray onto surface after cleaning and allow to dry.

CAUTION: Use caution when applying as surface may be slippery from mold/algae.

*NOTE: Results may vary based upon, following instructions, frequency of cleaning, amount of mold, mildew, moss and algae that needs to be cleaned, surface type, conditions and location (in the constant heavy shade, direct sunlight, etc.), climate conditions, etc. These conditions will impact the cleaning results and removal times.

Registrations & certifications:

Unlike other "green" products in the market, ZolaTerra® is the only plant-based, biodegradable, food safe cleaning product line certified with the NSF Non-Food Compound Product Registration and USDA Certified Biobased Product designation. a

Healthy Cleaning Made Simple.

Powered by the Sun and safe for the Earth.

ZOLA TERRA

How does ZolaTerra® work?

ZolaTerra® works on a microscopic level, using a combination of plant-based solvents, micelles and de-scalers, to safely remove dirt, grime and odors from any surface. ZolaTerra effectively cleans while near or practically at neutral pH.

How is ZolaTerra® different than bleach or other heavy-duty caustic cleaners?

Bleach works in a process called oxidation that turns a surface white or changes colors, leaving a white chalky film. Technically, bleach works to break up the chemical bonds of chromophores. The changed chromophore molecules either do not reflect colors or colors outside the visible spectrum.

ZolaTerra® looks and works differently. It is formulated to break down mold, algae or grime on a surface to safely wipe or rinse away, without any leftover residue. Continued or regular use and cleaning with ZolaTerra® should greatly reduce mold and algae from growing back and appearing on the surface.

Does ZolaTerra® smell like bleach or create volatile gases when mixed with water?

ZolaTerra® does not create volatile gases like bleach. ZolaTerra® also has virtually no odor in its concentrated state.

What type of PPE (Personal Protective Equipment) should be used when handling ZolaTerra®?

No special PPE is needed to handle ZolaTerra®. Even in a concentrated state, ZolaTerra® products are so safe that they will not chemically burn skin. However, we would never suggest not using PPEs, only that ZolaTerra® products will not cause chemical burns upon direct skin contact.

Are there special storage requirements for ZolaTerra® products?

No special storage conditions are required, as ZolaTerra® products are not hazardous or corrosive, even in a concentrated state.

What if I mix my ZolaTerra® concentrate too strongly? Will it harm my equipment?

No. You will simply have a very strong ZolaTerra® solution. This doesn't mean it will clean better, as we formulate our cleaners to work for specific solutions.

Will using hard water impact the effectiveness of the cleaning solution.

Yes, using hard water will reduce or lessen the cleaning performance of the solution. To get the best results, use room temperature **reverse osmosis** (RO) water, which is commonly found at any grocery store. (Water without calcium, magnesium or any other minerals) (RO water is typically less than \$1/gallon and will state on the label "made by reverse osmosis").

Why do I need to use clean bottles, sprayers, pumps and 55 gallon drums (if applicable) when mixing and using the ZolaTerra® product?

If equipment is not thoroughly cleaned prior to mixing or filling, ZolaTerra® may not be as effective or could create an unusable mixture of products. A different product left in a spray bottle, pump, pail or drum, combined with ZolaTerra®, could clog the sprayer.

NATURALLY DERIVED

ALL-PURPOSE

PLANT BASED

BIODEGRADABLE

NO DYES

HYPOALLERGENIC

SAFE FOR SKIN & PET

MADE IN USA

ZolaTerra® is a safe formula that will not trigger allergic responses or irritate skin. This product is safe for use in the presence of small children, chemically sensitive individuals and pets. This product is safe for all surfaces, is biodegradable and meets all OSHA and EPA regulations.
